

## **Sprint 3 Report**

RCV, Team: RCV, Date 05/27/16

### **Actions to stop doing:**

- Stop underestimating user stories on how long they will take. The tasks we underestimate end up take a lot more than we planned and impedes with our planned progress.

### **Actions to start doing:**

- Breaking user stories into smaller tasks. Some tasks that we create end up being bigger than we thought. Going through the tasks after we created them and trying to break them down even further might help

### **Actions to keep doing:**

- Regularly updating and merging code. This helps to make sure that everyone keeps their code up to date.

### **Work completed/not completed:**

Work completed:

- User Story 9: As a user, I want to be able to remove candidates manually so I can walk through the results of a hypothetical election without them. (Story Point: 10)
- User Story 10: As a user, I want to be able to filter the results to show only votes cast in a given time frame. (Story Point: 12)
- User Story 11: As a developer, I would like to seed real-world data to the database and set up communication between the server and the client. (Story Point 15)

Work not completed:

- User Story 6: As a user, I want to cast a ranked-choice vote so I can compare the experience to voting in a traditional election. (Story Point: 15)

### **Work completion rate:**

User stories completed: 3

Total number of estimated ideal hours completed: 25

Total number of days during the prior sprint: 15

User stories/day for prior sprint: 0.2

Ideal work hours/day for prior sprint: 1.6

User stories/day overall: 0.26

Ideal work hours/day overall: 2

### Burn-Up Chart:
